

BCA Blockchain Contract Audit

區塊鏈合約檢測服務

Project: Separly Token

Report date: Aug 29th, 2023

	Re-entrancy
	Overflow/underflow
	Use of block.timestamp
	Use of tx.origin
	Use of selfdestruct
	Storage conflict
	Force receive token
	Using inline assembly
	Access vulnerability
	Return value of low level call
	Return value of transfer
	Enable Trade

Audit Status: PASS

Vulnerabilities list	p.02
-----------------------------	------

Summary	p.04
----------------	------

Vulnerabilities Check	p.06
------------------------------	------

Conclusion	p.12
-------------------	------

Disclaimer	p.13
-------------------	------

Project name	Separly Token
Network	BSC
Language	Solidity
Delivery Date	2023/8
Contract Address	0x78e079B08e5920d6029EC6fE9aA83d611ea60b79

This report only covers a check of common vulnerabilities mentioned in the above list. Many critical vulnerabilities or malicious backdoors may not be detected. To undertake a more comprehensive inspection, we recommend upgrading to our full-service version.

	Token Information
Fee	Yes
Fee Privilege	Yes
Ownership	Yes
Max Tx Amount	Yes
Blacklist	None
Decimals	18
Max Supply	One Billion
Mint/Burn	None

Re-entrancy

If a contract has this vulnerability, when it calls an external contract, and does not update its status before sending funds, an attacker could continually call the withdraw function to transfer funds until all funds in the contract are depleted.

PASS

Overflow/underflow

When performing calculations on numbers, if the result exceeds or falls below the range of the type, an Overflow or Underflow vulnerability can occur.

PASS

Dependence on `block.timestamp`

Generating random numbers using global variables like `timestamp` can be predicted by attackers.

NONE

Use of `tx.origin`

When a contract uses `tx.origin` to verify user identity, malicious actors can exploit this vulnerability, masquerading as an address that can pass verification.

NONE

Use of selfdestruct

When a contract improperly uses the selfdestruct function, it can result in the contract being destroyed and its balance transferred to an address controlled by the attacker.

NONE

Storage conflict

If different variables share the same storage slot, it can lead to variables being maliciously altered by attacker.

PASS

Force receive token

If the balance of the contract is used as a check condition, the contract may become invalid if an attacker forces a transfer.

PASS

Using inline assembly

The use of assembly is error-prone and should be avoided.

NONE

Access vulnerability

Vulnerabilities in permissions may allow malicious actors to bypass identity checks for accessing functions, or to change the owner of the permissions.

PASS

Return value of low level call

This vulnerability refers to an issue where, during the execution of `call()`, a return value is typically given to indicate whether the function was successful or not. If this return value is not properly used, unexpected errors may occur.

NONE

Return value of transfer

This vulnerability refers to an issue where, during the execution of `transfer()`, a return value is typically given to indicate whether the transfer was successful or not. If this return value is not properly used, unexpected errors may occur.

WARM

Separly.sol: 107

Enable Trade

If the contract includes the "Enable Trade" feature, the project party has the right to disable users' token trading privileges. The users' assets will be at risk.

WARM

Separly.sol: 250

Conclusion

This implementation of the ERC20 token standard has undergone an audit, revealing potential risks associated with certain items on the list.

The contract owner has the authority to withdraw all BNB from the contract and modify the dividend token balances of all users. Investors must exercise caution and be aware of the risks involved.

Disclaimer

Before you use this website to fill in basic information, upload information and apply to this service, you have to read this Terms of Service on the website thoroughly to protect your right.

We only audit common hacking issues in the above smart contracts, and do not guarantee the business model of this project. Investment involves risks, please consider carefully before purchasing.
